

IFEOMA OZODIEGWU

I have published [scientific papers](#) that generate insights about global health from complex surveys, supported [national malaria programs](#) to apply quantitative methods to inform strategic planning, and developed analysis pipelines to make it [easy to visualise and generate estimates](#) from the Demographic and Health Surveys.

POSITIONS

present
|
2019

● Postdoctoral Fellow

Malaria Modeling Research Group (Gerardin's Lab)

📍 Northwestern University

- Conducted situational analysis of malaria morbidity and mortality in Nigeria and Burkina Faso with Demographic and Health Surveys, and routine data to estimate parameters for quantitative assessment of optimal intervention packages
- Provided technical advice to the Nigerian Malaria Elimination Programme on optimal subnational interventions along with related statistics to support evidence-based strategic planning, and the achievement of national malaria targets and policy-makers in endemic countries
- Collaborated with national and international experts to develop mathematical models of malaria transmission, reports and analyses, and document best practices and lessons learned
- Supported the development of national capacity building plans and strategies to develop evidence-informed subnational malaria strategic plans using mathematical models of malaria transmission
- Conducted a critique of the demographic and health surveys in relation to subnational malaria indicators to inform questionnaire and survey strategy improvements
- Collaborated with staff within Northwestern Memorial Hospital to support development of a simulation modeling platform for hospital surge capacity planning for COVID-19

2020

● Consultant

Dept of Science, Information and Dissemination

📍 World Health Organization

- Led data collation and quality assurance of the Eastern Mediterranean health indicators for the 2020 annual report
- Led data visualization of these indicators for the report, interfacing with the graphics team to ensure its timely production

2019
|
2015

● Research Associate

Dept of Biostatistics and Epidemiology

📍 East Tennessee State University

- Led research to estimate subnational obesity prevalence in 7 African countries to measure progress towards achieving targets in the Global Non-communicable Disease Monitoring Framework
- Analyzed the relationship between social determinants of health and obesity in 22 African countries and proposed recommendations for reducing obesity-related morbidity and mortality
- Supported research on adverse childhood experiences and questionnaire development

2015
|
2014

● Lead Consultant

Data Analysis and Evaluation

📍 Community Innovation Center

- Founded a consultancy company to support program planning, data analysis and evaluation
- Led a needs assessment to identify gaps and set priorities for restructuring of the Nigerian National Neglected Tropical Diseases Monitoring and Evaluation System (client: Federal Ministry of Health and RTI International)
- Developed and implemented a capacity building programme on data analysis and evaluation for Federal Ministry of Health Neglected Tropical Diseases Monitoring and Evaluation staff
- Supported development of data collection and analysis plans to understand the distribution and purchasing practices for malaria chemoprevention in Nigeria (client: Society for Family Health)

LANGUAGE SKILLS

R

SAS

Stata

Python

"I have extensive experience in supporting national programs and on projects that directly impact health in resource-limited settings."

2014
|
2013

Global Health Fellow

Research and Communications  Centre for Infectious Disease Research in Zambia

- Designed a data collection and analysis platform to collect health quality data, and conduct real-time descriptive analysis to understand factors associated with diarrheal disease in children under the age of five
- Collated data depicting the Zambian health situation and outcomes of health interventions led by CIDRZ staff, and created reports for Ministry of Health staff to inform priority-setting
- Led capacity building training in data collection and analysis for CIDRZ staff

2013
|
2012

Statistical Quality Assurance Specialist

Research and Evaluation  Washington DC Dept of Behavioral Health

- Supported design and implementation of surveys, and analysis to evaluate accessibility, acceptability and quality of mental health care received within the District of Columbia's public and private institutions
- Designed data collection system, and led capacity building for data collectors

OTHER POSITIONS

present
|
2020

Co-Principal Investigator

COVID-19 Rapid Response Grant Award

- Lead research to estimate Northwestern Memorial Hospital Bed Capacity Needs with a discrete event simulation model

2021
|
2019

Board Member

Malaria Modeling Consortium

- Represent Northwestern University at the Malaria Modeling Consortium, an international body of malaria modelers and stakeholders
- Contribute to the development of strategies to advance the use of modeling for national intervention planning
- Contribute to the development of standards within the modeling community

TALKS, PUBLICATIONS, & WORKING PAPERS

2021

Working Paper: Beyond national indicators: Adapting the Demographic and Health Surveys program to better inform subnational malaria intervention policy

Under peer review with the Malaria Journal

- Authored with Ambrose M, Battle K, Bever C, Diallo O, Galatas B, Runge M, Gerardin J

2021

Working Paper: Systematic review of the global implementation of adverse childhood experiences surveys

Under review with Child Abuse and Neglect

- Authored with Quinn M, Okwori Glory, Steward Steven, Linh Ha

2020

Application of mathematical models to inform national strategic planning in Nigeria

6th Future of Malaria Research Symposium

- Presentation of project performed at the Gerardin Lab

2020

Urban-rural determinants of malaria transmission intensity, insecticide treated net Access and use in Nigeria

Lightning Talk at the Northwestern Institute of Complex Systems

- Presentation of ongoing project at the Gerardin Lab with mentee, Chilochibi Chiziba

"I am passionate about data-driven decision-making. In many resource-poor settings, primary data is not readily available. My expertise lies in applying quantitative methods to make the best decisions with secondary data."

- 2020 ● **Is the positive association of middle income and rich household wealth on adult Sub-Saharan african womens overweight status modified by the level of education attainment? A cross-sectional study of 22 countries**
BMC Public Health
· Authored with Doctor HV, Quinn M, Mercer LD, Omoike EO, Mamudu HM
- 2020 ● **Working Paper: Adult female overweight and obesity prevalence in seven sub-saharan african countries: A baseline sub-national assessment of indicator 14 Of the Global NCD Monitoring Framework**
Preprints.org
· Authored with Mercer LD, Quinn M, Doctor HV, Mamudu HM
- 2019 ● **Country-level analysis of the association between maternal obesity with neonatal mortality in Sub-Saharan Africa: A cross-sectional study of Demographic and Health Surveys from 34 countries**
Annals of Global Health
· Authored with Mamudu HM, Wang L, Wallace R, Quinn M, Liu Y, Doctor HV
- 2019 ● **A qualitative evidence synthesis of contextual factors contributing to female overweight and obesity over the life course in Sub-Saharan Africa**
PLoS One
· Authored with Littleton MA, Nwabueze C, Famojuro O, Quinn M, Wallace R, Mamudu HM
- 2017 ● **Methods for understanding childhood trauma: modifying the adverse childhood experiences international questionnaire for cultural competency**
International Journal of Public Health
· Authored with Quinn M, Caldara G, Collins K, Owens H, Loudermilk E, Stinson JD

SELECTED PRESS (ABOUT)

- 2020 ● **Time to act on malnutrition in all its forms in West Africa**
Transform Nutrition West Africa
· My qualitative evidence synthesis was one of four works highlighted on this Bill and Melinda Gates Foundation funded knowledge mobilization platform
· I was asked to give direct comment on my findings to guide research and policy action

EDUCATION

- 2019 | 2015 ● **DrPH, Epidemiology**
Dept of Biostatistics and Epidemiology  East Tennessee State University
· Dissertation: The prevalence and context of Adult Female Overweight and Obesity in sub-Saharan Africa
· Recipient of a Rotary International Global Grant
- 2012 | 2010 ● **MPH, Health Services Administration**
Health Services Management and Policy  East Tennessee State University
· Supported evaluation of national tobacco policies during internship with the World Health Organization
· Recipient of the Frist Global Health Leader Award
